6' Aerodynamic Hayrack with Ladder and Tie Rails

Vented Generator Box for Hayrack

Aluminum Wheels

Neutral Stripe Package

THE MUSTANG

STRUCTURE AND CONSTRUCTION

Structure is the most important factor in building a trailer. Structure determines the longevity, durability and usability of the trailer. To keep components working at a high level, the trailer foundation needs to be strong. To construct this foundation, we use a welded structure throughout the frame. In addition to the welding, we utilize stainless huck fasteners and solid core rivets where necessary.

Top Rail – Continuous 5" radius rail with an overall height of 8" and a material thickness of 3/16" with an integrated drip rail.

Drop Gusset – 3/16" thickness, welded one piece gussets which add structure to provide maximum nose strength.

adds structure to provide maximum nose strength.

Drop Wall – 3/16” thickness with engineered break on top and bottom that adds strength and allows for a cleaner weld area to ensure against leakage.

Flooring – The Mustang’s floor structure consists of 4” I-beams with an upper 2-1/2” flange and a lower 3” flange on 12” centers. Elite utilizes a .125” thick, 5052 marine grade sheet floor on top of the structure.

Rear Frame – The rear frame is supported by a 2-1/2” x 5” upper header up to a 1/4” thick. For added strength, the rear frame side post is integrated through the floor into the bottom rail.

Aluminum Side Wall Construction – 6005 T6 aluminum alloy posts with 7” posts at the drop wall, 5” x 1-3/8” at doors and dividers, and 1-3/8” x 2-1/2” for all other side wall structure posts. The exterior, 6063 aluminum interlocking extruded slat is .125” thick. Exterior smooth sheets are a 3004 aluminum alloy with H291 temper and a thickness of up to .050”.

Roof Construction – 1” x 2-1/2” arched roof bows with one piece, .040” thick 3003 H16 aluminum roof sheet.

MUSTANG COMPONENTS

The components of a trailer determine ease of use, safety, and reliability of your trailer. Elite builds or purchases the best components available to the industry.

Doors – All Elite doors are built with heavy duty, proprietary extrusions and constructed to allow for maximum seal.

Drop Bars – The New Mustang Drop Bars are built to be long lasting and designed for simple use.

Lighting – Elite utilizes LED interior dome lights and exterior clearance lighting in all products standard.

Wiring Harness – Elite uses an automotive type encased wiring harness. All wiring connections are plugs or are soldered and covered with heat shrink material.

Horse Dividers – The Elite Mustang divider is built with designed extrusions that give it maximum strength.

Lining and Insulation – With 4 tiers of protection, the Mustang sidewalls provide protection from horses kicking and pawing, and helps prevent damage and exterior dings.

Wall Rubber – The wall rubber on the Mustang and Mustang LQ is corded smooth rubber matting that is able to absorb impacts that would damage lesser made products.

Axles and Tires – Elite uses Dexter Rubber Torsion axles with electric brakes and name brand tires based on the history of reliability.

Hinges – Elite's proprietary, heavy duty, extruded hinge is used for doors and dividers. This hinge is fitted with a brass fitting that lubricates and allows for a tighter fit the stainless pin. The hinge is welded to the structure to give us the strongest hinge possible.

Windows – Elite only uses the best of purchased windows. Available in many sizes and types, you can rest assured that they will be stalled, worry free.

Saddle Racks – The Elite built saddle racks are designed to hold a large variety of today's saddles.

Carpet – To provide longer durability, marine grade carpeting is used on all saddle racks and the dressing room of the Mustang.

THE ELITE FIT AND FINISH

Elite Trailers goes beyond our competition with fit and finish. The welds throughout the trailer are unmatched. Components are sanded or tumbled to provide a smooth touch without edges that can injure your horses. In areas where caulk is used, it is applied to coordinate the product and is done with great care not to take away from the trailer appearance. All trailers are checked against leaking.

MUSTANG LQ

8'8" LIVING QUARTERS

8'8" LIVING QUARTERS SPECIFICATIONS INCLUDE:

Sofa Sleeper or Dinette

16,000 BTU Ducted Furnace

Dual 20# LPG Tanks with Regulator

3 Cubic Foot Refrigerator

Large Radius Shower

Separate Toilet

Bathroom Sink

Large Wardrobe Closet

Two-Burner Cooktop

Microwave

Kitchen Sink

AM/FM Stereo with CD Player

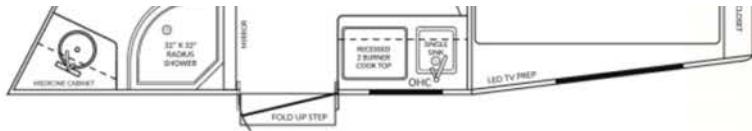

TV Antenna Package

Queen Size Mattress

13,500 BTU Air Conditioner with Heat Strip

<http://elitetrailers.com>

In 1995, Elite Trailers was formed with the passion and dedication to producing the highest quality aluminum trailer available to the market. With a fully supported staff of experienced and skilled employees, Elite Trailers has built on this passion, placing the customer and trailer first and foremost.

Elite's state of the art manufacturing facility with almost 250,000 square feet of manufacturing and service under roof was designed & built with one goal: The efficient manufacturing of the world's finest aluminum trailer. Elite has also made substantial investments in computerized tooling that is second to none in the industry. Designed to not only improve the fit, finish and structural integrity of our finished trailer, it has provided manufacturing process improvements that allow us to spend more time on the details that are important to you.

We use the best materials & construction practices to construct a superior built trailer. We build each trailer with acute attention to detail and finish it with the luxury that exceeds your standards. We construct our trailers to the highest of industry standards and pride ourselves on the creation of a lasting product. Our dealer network is experienced at helping design the trailer around your needs. Elite supports their dealer network with knowledgeable and experienced sales, parts and warranty, engineering and purchasing departments. Our customers need and expect the best! We're proud to build custom trailers that are as solid as the folks who buy them.

Elite Trailer is designed and engineered to haul your livestock comfortably and safely for distances far and wide. It will work as hard as you, it will be dependable, and it will stand the test of time. Custom trailers with impeccable quality and durability are our product; exceeding the expectations of our customers is our business.
